

GUIDED MISSILE AND ASTRONAUTICS INTELLIGENCE COMMITTEE

10 October 1961

TERMS OF REFERENCE

Anti Missile Working Group (AWG)

The Anti Missile Working Group will exchange information on the Soviet Anti Missile problem among Working Group member agencies and serve as a community reservoir of technical intelligence competence for Anti-Missile intelligence. The Working Group will keep GMAIC and SIC posted on developments as significant changes or new intelligence warrants and on call from GMAIC or SIC be prepared to submit draft papers as required for GMAIC and/or SIC approval. The Working Group will identify major intelligence gaps in the Anti-Missile field and recommend general collection directed toward fulfillment of such gaps. Differences in Service/Agencies views will be identified by the Working Group and when possible resolved by that group. This group is expected to display initiative but it should not engage in major efforts without GMAIC or SIC direction to do so. The Working Group, however, should point out areas where major committee efforts are needed.

Meetings will be held as often as required to fulfill the above mission.

USAF review(s)
completed.
